

PRESCRIBED MINIMUM BENEFITS (PMB) BASKET OF CARE FOR WORLD HEALTH ORGANIZATION (WHO) GLOBAL OUTBREAK BENEFIT

Who we are

Engen Medical Benefit Fund (referred to as 'the Fund'), registration number 1572, is a not-for-profit organisation, registered with the Council for Medical Schemes.

Discovery Health (Pty) Ltd, registration number 1997/013480/07, (referred to as 'the Administrator') is a separate company and an authorised financial services provider. Discovery Health is responsible for the administration of your membership on behalf of the Fund.

Overview

From time to time, there are viruses or diseases that affect world health. These outbreaks are closely monitored by the World Health Organization (WHO) and are, depending on the severity and spread, declared as pandemics that place the global population's health at risk.

We recognise the importance of being responsive to these public health emergencies. Through careful benefit design and in support of public health initiatives aimed at containing and mitigating the spread of such outbreak diseases, our members have access to supportive benefits during the outbreak period. The outbreak is actively monitored to closely assess the evolution and progression of the outbreak. Having a timely and effective response helps to improve the health outcomes for our members.

Cover for COVID-19 is subject to the use of the services of the Fund's Designated Service Providers (DSP) (where applicable), protocols and the treatment meeting specific entry criteria and guidelines. Any recommended treatment and healthcare services that are not included in a defined basket of care, are covered according to your available benefits, or in accordance with Prescribed Minimum Benefits (PMB), where applicable.

Engen Medical Benefit Fund covers more than just the minimum benefits required by law. This document provides information about the PMB basket of care for treating COVID-19 as part of the WHO Global Outbreak Benefit.

Please make sure your claims have the appropriate ICD-10 code

All claims must have the appropriate ICD-10 codes (diagnostic codes) so we can identify them and pay them from the WHO Global Outbreak Benefit. When your doctor refers you to the pathologist or radiologist, the referral must include the correct codes to enable the pathologists and radiologists to share information with us that will help us comply with legislation to pay PMB claims correctly.

We may pay claims from your day-to-day benefits if PMB requirements are not met

We will pay claims from your available day-to-day benefits when:

- The claims are submitted without the relevant PMB ICD-10 codes.
- The treatment does not meet the Fund's clinical entry criteria and guidelines for PMB funding.

What happens if you need more treatment or treatment that falls outside of these defined benefits

If you need treatment in excess of, or treatment that falls outside of the defined benefits, you and your doctor can send additional clinical information with a detailed explanation of the treatment that is needed, and we will review it. If this treatment is approved as a PMB, it will not be paid from your available day-to-day benefits, but from your approved PMB cover.

You can follow the below easy steps to apply for PMB cover in excess of the benefits stated in the tables below:

- 1) Download the "Request for additional cover for out-of-hospital Prescribed Minimum Benefit conditions" form. Up-to-date forms are always available on www.engenmed.co.za. You can also call **0800 001 615** to request any of the above forms.
- 2) Complete the form with the assistance of your doctor or healthcare professional.
- 3) Send the completed, signed form, along with any additional medical information, by email to PMB_APP_FORMS@engenmed.co.za.

If we approve the requested medicine or treatment, we will automatically pay the claims from your PMB cover for COVID-19. If the request is unsuccessful, and you are not satisfied with the outcome, you may dispute the funding decision. Call us to lodge a formal dispute.

For more information on your cover for PMB please visit our website www.engenmed.co.za.

COVID-19 vaccine

Administration of the COVID-19 vaccines is covered in accordance with the National Department of Health COVID-19 guidelines. All South Africans have access to the COVID-19 vaccines and boosters which are provided by the National Department of Health to public sector facilities and private service providers free of charge.

You will be required to register on the National Department of Health's Electronic Vaccination Data System (EVDS) and go to one of the accredited vaccination sites to get vaccinated. The list of accredited facilities is published by the National Department of Health.

You will have access to funding up to 100% of the Fund Rate for the following:

Description		Codes
COVID-19 vaccine administration	Administration fee including material	3002823001

Understanding Long COVID

“Long COVID” is the term commonly used to describe signs and symptoms that continue or develop after acute COVID-19 illness. It includes both ongoing symptomatic COVID-19 (from four to 12 weeks) and post COVID-19 syndrome (12 weeks or more). Some symptoms may only start for the first time three to four weeks after the acute COVID-19 infection.

Common symptoms of Long COVID include:

- Fatigue
- Persistent loss of smell and taste
- Shortness of breath
- Joint or muscle pains
- Persistent cough
- Headaches
- Difficulty thinking or concentrating (sometimes referred to as “brain fog”).

Other symptoms that have been reported include chest or stomach pain, fast-beating or pounding heart (also known as heart palpitations), pins-and-needles, diarrhoea, sleep problems, fever, dizziness on standing (light-headedness), body rash, mood changes, changes in menstrual cycles.

Illness severity can range from mild to critical:

- Mild to moderate – mild symptoms, mild pneumonia, occurs in approximately 80% of cases.
- Severe - difficulty breathing, requiring oxygen, generally results in an hospital admission.
- Critical - requiring intensive care.
